PREFACE	v
INTRODUCTION	
VECTOR NOTATION AND FORMULAE	
Sums, products, derivatives	1
CHAPTER I	
CURVES WITH TORSION	
ART.	
1. Tangent	10
2. Principal normal. Curvature	11
3. Binormal. Torsion. Serret-Frenet formulæ	13
4. Locus of centre of curvature	17
EXAMPLES I	18
5. Spherical curvature	21
6. Locus of centre of spherical curvature	23
7. Theorem: Curve determined by its intrinsic equations	25
8. Helices	26
9. Spherical indicatrix of tangent, etc.	28
10. Involutives	30
11. Evolutes	32
12. Bertrand curves	34
EXAMPLES II	36
CHAPTER II	
ENVELOPES. DEVELOPABLE SURFACES	
13. Surfaces	38
14. Tangent plane. Normal	38
ONE-PARAMETER FAMILY OF SURFACES	
15. Envelope. Characteristics	40
16. Edge of regression	42
17. Developable surfaces	43
DEVELOPABLES ASSOCIATED WITH A CURVE	
18. Osculating developable	45
19. Polar developable	46
20. Rectifying developable	46
TWO-PARAMETER FAMILY OF SURFACES	
21. Envelope. Characteristic points	48
EXAMPLES III	50

CONTENTS

CHAPTER III

CURVILINEAR COORDINATES ON A SURFACE.
FUNDAMENTAL MAGNITUDES

ART.		PAGE
22.	Curvilinear coordinates	51
23.	First order magnitudes	53
24.	Directions on a surface	55
25.	The normal	57
26.	Second order magnitudes	58
27.	Derivatives of \mathbf{n}	60
28.	Curvature of normal section. Meunier's theorem	61
	EXAMPLES IV	63

CHAPTER IV

CURVES ON A SURFACE

LINES OF CURVATURE

29.	Principal directions and curvatures	66
30.	First and second curvatures	68
31.	Euler's theorem	72
32.	Dupin's indicatrix	74
33.	The surface $z=f(x, y)$	75
34.	Surface of revolution	77
	EXAMPLES V	78

CONJUGATE SYSTEMS

35.	Conjugate directions	80
36.	Conjugate systems	81

ASYMPTOTIC LINES

37.	Asymptotic lines	83
38.	Curvature and torsion	84

ISOMETRIC LINES

39.	Isometric parameters	85
-----	--------------------------------	----

NULL LINES

40.	Null lines, or minimal curves	87
	EXAMPLES VI	88

CHAPTER V

THE EQUATIONS OF GAUSS AND OF CODAZZI

41.	Gauss's formulae for \mathbf{r}_{11} , \mathbf{r}_{12} , \mathbf{r}_{22}	90
42.	Gauss characteristic equation	93
43.	Mainardi-Codazzi relations	94
44.	Alternative expression. Bonnet's theorem	95
45.	Derivatives of the angle ω	96
	EXAMPLES VII	96

CONTENTS

ix

CHAPTER VI

GEODESICS AND GEODESIC PARALLELS

GEODESICS		
ART.		PAGE
46.	Geodesic property	99
47.	Equations of geodesics	100
48.	Surface of revolution	102
49.	Torsion of a geodesic	103
CURVES IN RELATION TO GEODESICS		
50.	Bonnet's theorem	105
51.	Joachimsthal's theorems	106
52.	Vector curvature	108
53.	Geodesic curvature, κ_g	108
54.	Other formulæ for κ_g	110
55.	Examples. Bonnet's formula	112
GEODESIC PARALLELS		
56.	Geodesic parallels. Geodesic distance	113
57.	Geodesic polar coordinates	115
58.	Total second curvature of a geodesic triangle	116
59.	Theorem on geodesic parallels	118
60.	Geodesic ellipses and hyperbolas	119
61.	Liouville surfaces	120
	EXAMPLES VIII	121

CHAPTER VII

QUADRIC SURFACES. RULED SURFACES

QUADRIC SURFACES		
62.	Central quadrics. Curvilinear coordinates	124
63.	Fundamental magnitudes	125
64.	Geodesics. Liouville's equation	127
65.	Other properties. Joachimsthal's theorem	129
66.	Paraboloids	131
	EXAMPLES IX	133
RULED SURFACES		
67.	Skew surface or scroll	135
68.	Consecutive generators. Parameter of distribution	136
69.	Line of striction. Central point	138
70.	Fundamental magnitudes	139
71.	Tangent plane. Central plane	140
72.	Bonnet's theorem	143
73.	Asymptotic lines	144
	EXAMPLES X	144

CHAPTER VIII

EVOLUTE OR SURFACE OF CENTRES. PARALLEL SURFACES

SURFACE OF CENTRES

ART.		PAGE
74.	Centro-surface. General properties	148
75.	Fundamental magnitudes	151
76.	Weingarten surfaces	154
77.	Lines of curvature	156
78.	Degenerate evolute	156

PARALLEL SURFACES

79.	Parallel surfaces	158
80.	Curvature	159
81.	Involutes of a surface	160

INVERSE SURFACES

82.	Inverse surface	162
83.	Curvature	164
	EXAMPLES XI	165

CHAPTER IX

CONFORMAL AND SPHERICAL REPRESENTATIONS.

MINIMAL SURFACES

CONFORMAL REPRESENTATION

84.	Conformal representation. Magnification	167
85.	Surface of revolution represented on a plane	168
86.	Surface of a sphere represented on a plane. Maps	170

SPHERICAL REPRESENTATION

87.	Spherical image. General properties	172
88.	Other properties	173
89.	Second order magnitudes	175
90.	Tangential coordinates	175

MINIMAL SURFACES

91.	Minimal surface. General properties	176
92.	Spherical image	178
93.	Differential equation in Cartesian coordinates	179
	EXAMPLES XII	181

CHAPTER X

CONGRUENCES OF LINES

RECTILINEAR CONGRUENCES

94.	Congruence of straight lines. Surfaces of the congruence	183
95.	Limits. Principal planes	184
96.	Hamilton's formula	187
97.	Foci. Focal planes	189

Cambridge University Press

978-1-316-60384-0 - Differential Geometry of Three Dimensions: Volume I

C. E. Weatherburn

Table of Contents

[More information](#)

CONTENTS		xi
ART.		PAGE
98.	Parameter of distribution for a surface	192
99.	Mean ruled surfaces	193
100.	Normal congruence of straight lines	196
101.	Theorem of Malus and Dupin	197
102.	Isotropic congruence	198
CURVILINEAR CONGRUENCES		
103.	Congruence of curves. Foci. Focal surface	199
104.	Surfaces of the congruence	200
105.	Normal congruence of curves	202
	EXAMPLES XIII	203
CHAPTER XI		
TRIPLY ORTHOGONAL SYSTEMS OF SURFACES		
106.	Triply orthogonal systems	207
107.	Normals. Curvilinear coordinates	207
108.	Fundamental magnitudes	209
109.	Dupin's theorem. Curvature	211
110.	Second derivatives of \mathbf{r} . Derivatives of the unit normals	213
111.	Lamé's relations	214
112.	Theorems of Darboux	216
	EXAMPLES XIV	218
CHAPTER XII		
DIFFERENTIAL INVARIANTS FOR A SURFACE		
113.	Point-functions for a surface	220
114.	Gradient of a scalar function	220
115.	Some applications	223
116.	Divergence of a vector	225
117.	Isometric parameters and curves	227
118.	Curl of a vector	228
119.	Vector functions (<i>cont.</i>)	230
120.	Formulae of expansion	232
121.	Geodesic curvature	233
	EXAMPLES XV	236
TRANSFORMATION OF INTEGRALS		
122.	Divergence theorem	238
123.	Other theorems	240
124.	Circulation theorem	243
	EXAMPLES XVI	244

Cambridge University Press

CONTENTS

CONCLUSION

FURTHER RECENT ADVANCES

ART.		PAGE
125.	Orthogonal systems of curves on a surface	247
126.	Family of curves on a surface	248
127.	Small deformation of a surface	250
128.	Oblique curvilinear coordinates in space	251
129.	Congruences of curves	252
	EXAMPLES XVII	254
130.	Family of curves (<i>continued</i>)	258
131.	Family of surfaces	260
	NOTE I. DIRECTIONS ON A SURFACE	263
	NOTE II. ON THE CURVATURES OF A SURFACE.	264
	INDEX.	266
