

## CONTENTS

<i>Preface</i>	<i>page v</i>
<i>Introductory.</i> Quadrivalency of carbon and deduction of types of carbon compounds; qualitative and quantitative analysis of organic compounds; determination of empirical and molecular formulae. The 'architecture' or constitution of the molecule	<i>p. 1</i>
<i>Chap. I.</i> Aliphatic hydrocarbons: paraffins, ethylenes (olefines), cycloparaffins, acetylenes and other unsaturated aliphatic hydrocarbons	<i>p. 13</i>
<i>Chap. II.</i> Aromatic hydrocarbons: benzene and its homologues. Aromatic derivatives of unsaturated hydrocarbons. Diphenyl, diphenylmethane, triphenylmethane, naphthalene, anthracene and phenanthrene	<i>p. 56</i>
<i>Chap. III.</i> Monohydroxy-derivatives of hydrocarbons: alcohols and certain derivatives	<i>p. 85</i>
<i>Chap. IV.</i> Hydroxy-derivatives of cyclic hydrocarbons: phenols and certain derivatives	<i>p. 119</i>
<i>Chap. V.</i> Ethers	<i>135</i>
<i>Chap. VI.</i> Aldehydes and ketones and certain derivatives	<i>142</i>
<i>Chap. VII.</i> Simple monobasic acids: acid chlorides, acid anhydrides, amides and esters	<i>p. 191</i>
<i>Chap. VIII.</i> Homologues of acetic acid. Monobasic unsaturated acids and some derivatives	<i>p. 218</i>
<i>Chap. IX.</i> Aromatic acids and some derivatives	<i>234</i>
<i>Chap. X.</i> Organic bases: aliphatic amines and some derivatives; aromatic amines and some derivatives; heterocyclic bases and some derivatives	<i>p. 245</i>
<i>Chap. XI.</i> Amino acids: $\alpha$ -amino acids and their derivatives; peptides. Aromatic amino acids. Indigo	<i>p. 309</i>
<i>Chap. XII.</i> Stereoisomerism and optical activity	<i>341</i>
<i>Chap. XIII.</i> Glycols (dihydric alcohols) and some derivatives; malonic and acetoacetic acid and some derivatives	<i>p. 351</i>

<i>Chap. XIV.</i> Glycerol and some derivatives. The erythritols and tartaric acids: hemihedrisms and enantiomorphism; resolution of racemic acid	<i>p.</i> 385
<i>Chap. XV.</i> <i>n</i> -Pentitols and pentoses. <i>n</i> -Hexitols and hexoses or monosaccharides: glycosides, disaccharides and polysaccharides. Estimation of reducing sugars. Fermentation of hexoses	<i>p.</i> 408
<i>Chap. XVI.</i> Derivatives of carbonic acid. Urea and certain derivatives; ureides; guanidine and certain derivatives; purines	<i>p.</i> 473
<i>Chap. XVII.</i> Organo-metallic compounds: syntheses by means of zinc alkyls and magnesium alkyl and aryl halides	<i>p.</i> 494
<i>Appendix.</i> Isolation and purification of organic compounds; identification and determination of physical constants of organic compounds; typical apparatus used in the preparation and isolation of organic compounds	<i>p.</i> 502
Table of symbols, atomic numbers and atomic weights	515
<i>References</i>	516
<i>Index</i>	517
