

INDEX

The numbers refer to pages

- α -error (type I error), 193
- analysis of variance, 156
- a posteriori* probability, 38
- a priori* probability, 38
- arbitrary origin, 2, 4, 15, 89, 138
- arithmetic mean, 1
- array of points, 127
- average, 1, 157

- β -error (type II error), 193
- Bayes' theorem, 39
- Bernoulli's theorem, 187
- between-the-rows, 157
- between-the-columns, 162
- binomial distribution, 49, 187
- bivariate distribution, 121

- cap (\cap), 33
- central limit theorem, 187
- central tendency, 1
- Chebyshev's theorem, 187
- chi-squared or χ^2 , 67, 187
- coefficient of correlation, 136, 187
- coefficient of rank correlation, 144, 188
- coefficient of regression, 127, 188
- combinations (nC_r) or nC_r , 41, 188
- conditional probability, 34
- confidence limits, 93, 188, 189
- contingency tables, 76
- continuous distribution, 12, 80
- controls, method of, 97
- conversion of range to σ , 5, 112
- correlation, 121, 136, 187
- correlation by ranks, 144, 188
- correlation coefficient, 136, 187
- covariance, 128, 188
- cup (\cup), 33

- degrees of freedom, 9, 68, 188, 198
- dependent variable, 122
- deviation, 3
- dichotomy, 130
- difference between means
 - large samples, 102, 192
 - small samples, 105, 192
- direct correlation, 121
- dispersion, 5

- error curve, 21
- estimate, $\text{Est}(\mu)$ or $\text{Est}(\sigma)$, 8
- exhaustive outcomes, 30
- exponential distribution, 188
- expected frequencies, 49, 67

- factorial n , $n!$ or \underline{n} , 41
- freedom, degrees of, 9, 68, 188, 198
- frequency distribution, 10
- frequency polygon, 12
- F -tables, 202, 203
- F -test, 154

- Gaussian curve, 21
- group interval, 10

- histogram, 11, 25

- independent events, 34
- independent variable, 122
- inner control line, 114
- interval estimate, 189
- inverse correlation, 122

- Kendall's τ , 147

- least squares, 122, 189
- line of regression, 122
- location, 1
- lower control limit, 117
- lower quartile, 190

- mean, 2, 13, 24, 190
- mean deviation, 19, 175, 190
- mean of an array, 127
- mean square, 3, 8, 157
- median, 1, 190
- method of controls, 97
- minimum values of r_{xy} , 142, 187
 - of ρ , 148
 - of τ , 152
- moments, 15
- mutually exclusive, 30, 31, 32, 33

- normal distribution, 21, 190, 195, 196
- normal frequency curve, 21, 190, 195
- normal equations, 125, 190

INDEX

- normal probability curve, 21, 190, 195
 null hypothesis, 67–111, 163, 191
 number of degrees of freedom, 9, 68, 76, 93, 157, 198
 number of restrictions, 69, 198
- observed frequencies, 49, 67
 origin, 2
 outer control line, 114
- paired-sample *t*-test, 97, 111
 parameters, 8, 191
 parent population, 8
 percentiles, 191
 point estimate, 191
 Poisson distribution, 60
 posterior probability, 38
 power of significance test, 191
 prior probability, 38
 probability, 30
 probability distribution, 44
 probability generating function, 191
 product-moment, 136, 139
- quality control, 112
 quartiles, 191
- random experiment, 31
 random process, 31
 random sample, 8
 range, 5
 range, conversion to σ , 112
 rank correlation, 144, 188
 rectangular distribution, 174
 regression coefficient, 127, 189
 regression line, 122, 189
 relative frequency, 31, 57
 replications, 156, 161
 residuals, 126
 residual-mean-square, 162
 restrictions, number of, 69, 198
 root-mean-square, 3
- sampling bottle, 51
 sampling distribution, 191
 sampling in industry, 53, 112
 scatter diagram, 121
 second moment, 15
 selections (nP_r) or nC_r , 41, 188
 Sheppard's correction, 14, 191
 significance, 67, 76, 89, 192
 significance, single mean, 94, 192
 difference between means, 102, 105, 192
 Simpson's rule, 22
 Spearman's ρ , 144
 spread, 5
 standard deviation, 3, 14, 24, 192
 standardized deviate, 25, 193
 standard error, 93, 189
 statistic, 16
 suffix, 2
 sum-of-squares, 3, 157
- t*-distribution, 93, 189, 192
t-table, 200
 tolerance limits, 29, 117
 two-tail probability, 90
 types I and II errors, 193
- upper quartile, 193
 upper tolerance limit, 117
- variability, 5, 27, 28, 112
 variance, 3, 14
 variance ratio, 154
 Venn diagram, 33
- within-the-rows, 158
 within-the-columns, 162
 working zero (arbitrary origin), 2, 4, 15, 89, 138
- Yates's correction, 80, 193
