PREFACE

THE following pages continue the discussion of the subject along lines which are a natural extension of those followed in our earlier volume. Most of the chapters are based on recent papers by the author; but the scope of the book is widened by the treatment of other topics also. Chapter XII, for instance, contains a brief discussion of Flexion and Applicability of Surfaces, giving an account of some of the theorems that have already become classical; while Chapter IV supplements the treatment of Ruled Surfaces and W -surfaces contained in the first volume, and Chapter IX gives a simple exposition of Levi-Civita's theory of "parallel displacements" on a surface, with some applications to Tchebychef Systems of curves. Chapter XIII represents an extension of the theory of Curvilinear Congruences given in two recent papers by the author.

I have to thank many distant correspondents for their written appreciation of the preceding volume. I hope this one will prove equally helpful.

C. E. W.

CHAPTER I

DIFFERENTIAL INVARIANTS FOR A SURFACE

ART.

1. Gradient of a scalar function. Derivatives	1
2. Divergence and rotation of a vector	2
3. Formulae of expansion	3
4. Differential invariants of the second order	5
5. Order of directional differentiations	6
6. Derivatives of the unit vectors \mathbf{a} , \mathbf{b} , \mathbf{n}	7
7. Other differential invariants	8
EXAMPLES I	10

CHAPTER II

FAMILIES OF CURVES ON A SURFACE

8. Curvature properties	13
9. Rate of rotation of the trihedral	14
10. Moment of the family. Line of zero moment	15
11. Line of striction. Divergence of the family	16
12. Parallels and geodesics	17
13. Orthogonal systems of curves	19
14. Isometric orthogonal systems	21
15. Oblique trajectories of an isometric system	23
16. Alternative form of the condition for isometry	24
17. Family of parallel geodesics	24
18. Flux and circulation	25
EXAMPLES II	28

CHAPTER III

FAMILIES OF CURVES (*continued*).

OBLIQUE TRAJECTORIES

19. Two differential invariants of a scalar function	30
20. Related invariants of a vector function	31

FAMILY OF CURVES ($\phi = \text{const.}$)

21. Distance function. Line of striction. Moment	32
22. Normal curvature. Conjugate direction	34
23. Orthogonal trajectories of the family	36

OBLIQUE TRAJECTORIES		
ART.		PAGE
24.	Line of striction. Parallels	37
25.	Geodesic curvature. Various theorems	38
26.	Moment of family. Lines of curvature	40
27.	Normal curvature. Conjugate direction	41
	EXAMPLES III	42
CHAPTER IV		
RULED SURFACES. WEINGARTEN SURFACES		
RULED SURFACES		
28.	Some general observations	43
29.	Choice of coordinates. Curvatures	44
30.	Explicit expressions	46
31.	Geometrical illustration. Divergence of generators	48
32.	Isometric systems on a skew surface	49
WEINGARTEN SURFACES		
33.	Ruled Weingarten surfaces	50
34.	Weingarten surfaces in general	52
35.	Differential equation satisfied by the unit normal	54
36.	Lines of constant curvature	55
37.	Surface of constant first curvature	55
38.	Surfaces of revolution	57
	EXAMPLES IV	58
CHAPTER V		
CURVILINEAR COORDINATES IN SPACE.		
DIFFERENTIAL INVARIANTS		
39.	Notation. Fundamental magnitudes	62
40.	Unit normals to the parametric surfaces	64
41.	Gradient of a scalar function	65
42.	The operator ∇	67
43.	Divergence and rotation of a vector	68
44.	Formulae of expansion	70
45.	Differential invariants of the second order	71
46.	Orthogonal coordinates	72
47.	Semi-orthogonal coordinates	74
48.	A differential invariant	75
TRANSFORMATION OF INTEGRALS		
49.	Line and surface integrals. Stokes's Theorem	76
50.	The Divergence Theorem of Gauss	78
51.	Green's Theorem, and others	80
	EXAMPLES V	81

CONTENTS

ix

CHAPTER VI

FAMILIES OF SURFACES

ART.		PAGE
52.	First curvature of a surface	85
53.	Rotation of \mathbf{n} . Parallel surfaces	87
54.	Second curvature of a surface	88
55.	Second curvature (<i>continued</i>)	90
56.	Orthogonal trajectories of the surfaces	91
57.	Lines of equidistance on any surface	92
58.	Isometric system of surfaces	94
59.	Family of Weingarten surfaces	95

LAME FAMILIES OF SURFACES

60.	Equation of condition	96
61.	Orthogonal trajectories of the surfaces	98
62.	The distance function for the family	99
63.	Surfaces of constant first curvature	101
64.	Lamé family of developable surfaces	102
	EXAMPLES VI	103

CHAPTER VII

TENSORS OF THE SECOND ORDER.

DYADICS

65.	Dyads and dyadics	106
66.	Open products of vectors	107
67.	Products of dyads and of dyadics	108
68.	Nonion form. Scalar and vector of a dyadic	109
69.	The unit dyadic. Reciprocal dyadics	110
70.	Symmetric and anti-symmetric dyadics	112
71.	Cross product of a dyadic and a vector	113
72.	Double multiplication of dyads and dyadics	114
73.	Second and third of a dyadic	115
74.	Scalar invariants of a dyadic	116

DYADICS FORMED WITH THE OPERATOR ∇

75.	The dyadics $\nabla\mathbf{s}$ and $\mathbf{s}\nabla$	117
76.	Formulae of expansion	118
77.	The operator ∇ for a given surface	120
78.	The dyadic $\nabla\mathbf{n}$ for a surface	121
79.	Other geometrical illustrations	122
	EXAMPLES VII	124

CHAPTER VIII

FAMILIES OF CURVES AND FUNCTIONS OF DIRECTION
ON A SURFACE

CENTRAL QUADRICS

ART.		PAGE
80.	Central quadric surfaces	128
81.	Central conics	129

FAMILY OF CURVES ON A SURFACE

82.	Tendency in any direction. First conic	131
83.	Moment for any direction. Second conic	133
84.	Swerve of the family. Third conic	136

FUNCTIONS OF DIRECTION ON A SURFACE

85.	Mainardi-Codazzi relations. Gauss equation	137
86.	Functions of Laguerre and Darboux	138
87.	Codazzi function of three directions	141
	EXAMPLES VIII	142

CHAPTER IX

LEVI-CIVITA'S PARALLEL DISPLACEMENTS.

TCHEBYCHEF SYSTEMS

88.	Levi-Civita's conception of parallelism	144
89.	Condition for a parallel displacement	145
90.	Two theorems on parallel displacement	148
91.	Parallel displacement round a closed curve	149

TCHEBYCHEF SYSTEMS

92.	Tchebychef nets	150
93.	Lines of striction and normal curvature	152
94.	Further properties of a Tchebychef system	153
	EXAMPLES IX	155

CHAPTER X

REPRESENTATION OF SURFACES.

CONICAL PROJECTION

95.	Linear transformation. Extension ratio	156
96.	Extension ellipses	157
97.	Principal directions for the representation	158
98.	Fundamental magnitudes and the operator ∇' on S'	160

CONICAL PROJECTION

99.	Conical projection in general	162
100.	A particular case	163
	EXAMPLES X	166

CONTENTS

CHAPTER XI

SMALL DEFORMATIONS OF CURVES AND SURFACES

SMALL DEFORMATIONS OF CURVES

ART.		PAGE
101.	Single twisted curve	167
102.	Family of curves on a surface	169

SMALL DEFORMATIONS OF SURFACES

103.	First order magnitudes. Modulus of dilation	171
104.	Unit normal to the deformed surface	171
105.	Curvatures of the deformed surface	172
106.	Modulus of extension. Change of inclination	173
107.	Rotation of element of surface	176
108.	Alternative method	177
109.	Differential invariants for the deformed surface	178
110.	Small deformation by conical projection	179
111.	Small inextensional deformation	181
112.	Small deformation of a family of surfaces	182
	EXAMPLES XI	185

CHAPTER XII

FLEXION OF SURFACES. APPLICABILITY

113.	Applicability. Quantities unaltered by flexion	187
114.	The problem of Minding	188
115.	Exceptional case	190
116.	Surfaces of constant Gaussian curvature	193
117.	Three forms of ds^2 for pseudospherical surfaces	195
118.	Surface deformable on itself.	197
119.	Second problem of applicability	199
120.	Assigned deform of a given curve on S	201

FLEXION OF RULED SURFACES

121.	Theorems of Bonnet and Beltrami	203
122.	Second theorem of Bonnet	205
	EXAMPLES XII	206

CHAPTER XIII

CURVILINEAR CONGRUENCES

123.	Introduction	208
------	------------------------	-----

FIRST METHOD

124.	Notation	208
125.	Foci. Focal surface	209
126.	Limits. Limit surface	211
127.	Surface of striction. Divergence of the congruence	214
