- base change formula
  - for D-modules, 17
  - for indsheaves, 25
  - for sheaves, 9
- bordered spaces, 58
  - proper morphism of, 61
- D-module, 9
  - good, 12
  - holonomic, 12
  - quasi-good, 12
  - regular holonomic, 44
- de Rham complex, 13
- de Rham functor, 16
  - enhanced, 81
  - tempered, 39
- duality
  - for D-modules, 13
  - for enhanced indsheaves, 74
- dualizing complex, 7
- enhanced Fourier–Sato transform, 98–100
- enhanced indsheaves, 67
- enhanced tempered holomorphic functions, 80
- exponential D-modules, 79
- external tensor product
  - for D-modules, 15
  - for enhanced indsheaves, 71
  - for sheaves, 8
- Fourier–Sato transform
  - enhanced, 98–100
- good D-module, 12
- good topological space, 7
- Grothendieck’s six operations
  - for enhanced indsheaves, 69
  - for indsheaves, 21
  - for sheaves, 8
- holonomic D-module, 12
- ind-object, 18
- indsheaves, 20
  - enhanced, 67
  - of tempered  $C^\infty$ -functions, 31
  - of tempered distributions, 31
  - of tempered holomorphic functions, 35
  - of Whitney functions, 31
  - of Whitney holomorphic functions, 35
- integral transforms, 97
  - regular, 55
- Laplace kernel, 101
- Laplace transform, 100
- non-characteristic, 16
- normal form, 86
  - quasi-, 86
  - regular, 46
- polynomial growth, 30
- projection formula
  - for D-modules, 16
  - for indsheaves, 25
  - for sheaves, 8
- proper morphism, of bordered spaces, 61
- quasi-good D-module, 12
- quasi-normal form, 86

- $\mathbb{R}$ -constructible enhanced indsheaves, 74
- $\mathbb{R}$ -constructible sheaves, 9
- ramification, 86
- real blow up, 48
- regular holonomic D-module, 44
- residue morphism, 16
- Riemann–Hilbert correspondence
  - enhanced, 96
  - generalized, 94
  - generalized regular, 52
  - regular, 54
- solution functor, 16
  - enhanced, 81
  - tempered, 39
- Spencer complex, 14
- stable object, 72
- Stokes matrices, 85
- subanalytic indsheaf, 27
- subanalytic site, 26
- subanalytic space, 26
- subanalytic subset, 9
- tempered  $C^\infty$ -functions, 30
- tempered distributions, 31
- tempered Grauert theorem, 41
- tempered holomorphic functions, 35
- transfer bimodule, 15
- transversal Cartesian diagram, 17
- Weyl algebra, 101
- Whitney functions, 31
