

## CONTENTS

<i>List of Plates</i>	<i>page</i> vi
<i>Preface</i>	vii
<b><i>Chapter 1. THE ELEMENTS OF PROGRAMMING</i></b>	
1.1 Introduction	1
1.2 A simple calculation and its mechanization	2
1.3 A simple automatic computer	5
1.4 The control unit: jump instructions	9
1.5 Modification of instructions	11
1.6 Instruction codes in real machines	13
<b><i>Chapter 2. INPUT, STORAGE AND OUTPUT OF NUMBERS</i></b>	
2.1 Decimal and binary notation	15
2.2 The sign and size of numbers	17
2.3 Binary storage systems	18
2.4 Input-output equipment	23
<b><i>Chapter 3. THE ORGANIZATION OF PROGRAMMES</i></b>	
3.1 Dividing a programme into routines	27
3.2 Library routines	29
3.3 The organization of sub-routines	32
3.4 The development of a programme	34
3.5 Testing programmes	35
3.6 Automatic coding	37
<b><i>Chapter 4. THE SOLUTION OF ENGINEERING PROBLEMS</i></b>	
4.1 Single problems	40
4.2 Repetitive problems	41
4.3 Factors in the design of standard programmes	41
4.4 Problems which have been solved on computers	44
4.5 Digital computers and mathematical methods	50
4.6 The human factor	51
4.7 Future prospects	52
<i>References for further reading</i>	54
<i>Index</i>	55
