## 1 The Scientific Study of Politics ............................. 1

1.1 Political Science? .......................... 1
1.2 Approaching Politics Scientifically: the Search for Causal Explanations 3
1.3 Thinking about the World in Terms of Variables and Causal Explanations 7
1.4 Models of Politics ...................... 16
1.5 Rules of the Road to Scientific Knowledge about Politics 17
  1.5.1 Focus on Causality .......... 17
  1.5.2 Don’t Let Data Alone Drive Your Theories 17
  1.5.3 Consider Only Empirical Evidence 18
  1.5.4 Check Your Ideology at the Door and Avoid Normative Statements 19
  1.5.5 Pursue Both Generality and Parsimony 20
1.6 A Quick Look Ahead .................. 20
Concepts Introduced in This Chapter 21
Exercises .................................. 22

## 2 The Art of Theory Building ......................... 25

2.1 Good Theories Come from Good Theory-Building Strategies 25
2.2 Promising Theories Offer Answers to Interesting Research Questions 26
## Contents

2.3 Identifying Interesting Variation 27
2.3.1 Cross-Sectional Example 28
2.3.2 Time-Series Example 30
2.4 Learning to Use Your Knowledge 31
2.4.1 Moving from a Specific Event to More General Theories 31
2.4.2 Know Local, Think Global: Can You Drop the Proper Nouns? 32
2.5 Three Strategies toward Developing an Original Theory 33
2.5.1 Theory Type 1: a New Y (and Some X) 34
2.5.2 Project Type 2: an Existing Y and a New X 35
2.5.3 A New Z which Modifies an Established X → Y 36
2.6 Using the Literature without Getting Buried in It 38
2.6.1 Identifying the Important Work on a Subject – Using Citation Counts 38
2.6.2 Oh No! Someone Else Has Already Done What I Was Planning to Do. What Do I Do Now? 39
2.6.3 Critically Examining Previous Research to Develop an Original Theory 39
2.7 Think Formally about the Causes that Lead to Variation in Your Dependent Variable 42
2.7.1 Utility and Expected Utility 43
2.7.2 The Puzzle of Turnout 45
2.8 Think about the Institutions: the Rules Usually Matter 47
2.8.1 Legislative Rules 48
2.8.2 The Rules Matter! 49
2.8.3 Extensions 51
2.9 Conclusion 51
Concepts Introduced in This Chapter 51
Exercises 52

3 Evaluating Causal Relationships 56
Overview 56
3.1 Causality and Everyday Language 56
3.2 Four Hurdles along the Route to Establishing Causal Relationships 60
3.2.1 Putting It All Together – Adding Up the Answers to Our Four Questions 63
3.2.2 Identifying Causal Claims Is an Essential Thinking Skill 65
3.2.3 What Are the Consequences of Failing to Control for Other Possible Causes? 68
3.3 Why Is Studying Causality So Important? Three Examples from Political Science 69
3.3.1 Life Satisfaction and Democratic Stability 69
3.3.2 Race and Political Participation in the United States 70
3.3.3 Evaluating Whether “Head Start” Is Effective 72
3.4 Wrapping Up 73
Concepts Introduced in This Chapter 74
Exercises 74
## Contents

### 4 Research Design

Overview: 77

- 4.1 Comparison as the Key to Establishing Causal Relationships: 77
- 4.2 Experimental Research Designs: 78
  - 4.2.1 Experimental Designs and the Four Causal Hurdles: 84
  - 4.2.2 “Random Assignment” versus “Random Sampling”: 85
  - 4.2.3 Varieties of Experiments and Near-Experiments: 86
  - 4.2.4 Are There Drawbacks to Experimental Research Designs?: 88
- 4.3 Observational Studies (in Two Flavors): 92
  - 4.3.1 Datum, Data, Data Set: 95
  - 4.3.2 Cross-Sectional Observational Studies: 95
  - 4.3.3 Time-Series Observational Studies: 97
  - 4.3.4 The Major Difficulty with Observational Studies: 98
- 4.4 Dissecting the Research by Other Scholars: 99
- 4.5 Summary: 100

### 5 Measuring Concepts of Interest

Overview: 104

- 5.1 Getting to Know Your Data: 104
- 5.2 Social Science Measurement: the Varying Challenges of Quantifying Human Behavior: 106
- 5.3 Problems in Measuring Concepts of Interest: 111
  - 5.3.1 Conceptual Clarity: 111
  - 5.3.2 Reliability: 112
  - 5.3.3 Measurement Bias and Reliability: 113
  - 5.3.4 Validity: 114
  - 5.3.5 The Relationship between Validity and Reliability: 115
- 5.4 Controversy 1: Measuring Democracy: 116
- 5.5 Controversy 2: Measuring Political Tolerance: 120
- 5.6 Are There Consequences to Poor Measurement?: 122
- 5.7 Conclusions: 122

### 6 Getting to Know Your Data

Overview: 125

- 6.1 Getting to Know Your Data Statistically: 125
- 6.2 What Is the Variable’s Measurement Metric?: 126
  - 6.2.1 Categorical Variables: 127
  - 6.2.2 Ordinal Variables: 127
  - 6.2.3 Continuous Variables: 129
  - 6.2.4 Variable Types and Statistical Analyses: 130
- 6.3 Describing Categorical Variables: 130
## Contents

6.4 Describing Continuous Variables 132
  6.4.1 Rank Statistics 133
  6.4.2 Moments 136

6.5 Limitations of Descriptive Statistics and Graphs 139
6.6 Conclusions 139

Concepts Introduced in This Chapter 140
Exercises 141

7 Probability and Statistical Inference 143

Overview 143
7.1 Populations and Samples 143
7.2 Some Basics of Probability Theory 145
7.3 Learning about the Population from a Sample: the Central Limit Theorem 148
  7.3.1 The Normal Distribution 148
7.4 Example: Presidential Approval Ratings 154
  7.4.1 What Kind of Sample Was That? 155
  7.4.2 Obtaining a Random Sample in the Cellphone Era 156
  7.4.3 A Note on the Effects of Sample Size 157
7.5 A Look Ahead: Examining Relationships between Variables 159
Concepts Introduced in This Chapter 159
Exercises 160

8 Bivariate Hypothesis Testing 161

Overview 161
8.1 Bivariate Hypothesis Tests and Establishing Causal Relationships 161
8.2 Choosing the Right Bivariate Hypothesis Test 162
8.3 All Roads Lead to \( p \) 163
  8.3.1 The Logic of \( p \)-Values 163
  8.3.2 The Limitations of \( p \)-Values 164
  8.3.3 From \( p \)-Values to Statistical Significance 165
  8.3.4 The Null Hypothesis and \( p \)-Values 166
8.4 Three Bivariate Hypothesis Tests 166
  8.4.1 Example 1: Tabular Analysis 166
  8.4.2 Example 2: Difference of Means 173
  8.4.3 Example 3: Correlation Coefficient 178
8.5 Wrapping Up 184
Concepts Introduced in This Chapter 184
Exercises 185

9 Two-Variable Regression Models 188

Overview 188
9.1 Two-Variable Regression 188
9.2 Fitting a Line: Population \( \leftrightarrow \) Sample 189
9.3 Which Line Fits Best? Estimating the Regression Line 191
9.4 Measuring Our Uncertainty about the OLS Regression Line 195

<td>247</td>
</tr>
</tbody>
</table>
## Table of Contents

### 11.2.2 Using Dummy Variables to Test Hypotheses about a Categorical Independent Variable with More Than Two Values

11.2.3 Using Dummy Variables to Test Hypotheses about Multiple Independent Variables

11.3 Testing Interactive Hypotheses with Dummy Variables

11.4 Outliers and Influential Cases in OLS

11.4.1 Identifying Influential Cases

11.4.2 Dealing with Influential Cases

11.5 Multicollinearity

11.5.1 How Does Multicollinearity Happen?

11.5.2 Detecting Multicollinearity

11.5.3 Multicollinearity: a Simulated Example

11.5.4 Multicollinearity: a Real-World Example

11.5.5 Multicollinearity: What Should I Do?

11.6 Wrapping Up

### Limited Dependent Variables and Time-Series Data

**Overview**

12.1 Extensions of Ordinary Least Squares

12.2 Dummy Dependent Variables

12.2.1 The Linear Probability Model

12.2.2 Binomial Logit and Binomial Probit

12.2.3 Goodness-of-Fit with Dummy Dependent Variables

12.3 Being Careful with Time Series

12.3.1 Time-Series Notation

12.3.2 Memory and Lags in Time-Series Analysis

12.3.3 Trends and the Spurious Regression Problem

12.3.4 The Differenced Dependent Variable

12.3.5 The Lagged Dependent Variable

12.4 Example: the Economy and Presidential Popularity

12.5 Wrapping Up

### Appendix A. Critical Values of Chi-Squared

### Appendix B. Critical Values of t

### Appendix C. The $\Lambda$ Link Function for Binomial Logit Models

### Appendix D. The $\Phi$ Link Function for Binomial Probit Models

**Index**
