

## The Bronze Horseman of Justinian in Constantinople

Justinian's triumphal column was the tallest freestanding column of the premodern world and was crowned with arguably the largest metal equestrian sculpture created anywhere in the world before 1699. The Byzantine empire's bronze horseman towered over the heart of Constantinople, assumed new identities, spawned conflicting narratives, and acquired widespread international acclaim. Because all traces of Justinian's column were erased from the urban fabric of Istanbul in the sixteenth century, scholars have undervalued its astonishing agency and remarkable longevity. Its impact in visual and verbal culture was arguably among the most extensive of any Mediterranean monument. This book analyzes Byzantine, Islamic, Slavic, Crusader, and Renaissance historical accounts; medieval pilgrimages; geographic, apocalyptic, and apocryphal narratives; vernacular poetry; Byzantine, Bulgarian, Italian, French, Latin, and Ottoman illustrated manuscripts; Florentine wedding chests; Venetian paintings; and Russian icons to provide an engrossing and pioneering biography of a contested medieval monument during the millennium of its life.

ELENA N. BOECK is Professor of History of Art and Architecture at DePaul University. Her publications explore intellectual exchange in the Mediterranean and unconventional, fascinating forms of engagement with Byzantium's legacy. She is the author of *Imagining the Byzantine Past: The Perception of History in the Illustrated Manuscripts of Skylitzes and Manasses* (Cambridge University Press, 2015). She held appointments as the Excellence Initiative Professor at Radboud University, and Director of Byzantine Studies at Dumbarton Oaks.

## Acknowledgements

This book began as a small quest to answer a deceptively simple question: why is Justinian's column represented in a fourteenth-century Bulgarian manuscript? The bronze horseman curiously appears in an illustration in the Vatican Manasses. While that text says a lot about Justinian, it never mentions the column. To answer that original question, I had to solve dozens of new puzzles. This project has been an extraordinarily enjoyable experience and a rewarding intellectual journey into many fields.

In this ever-expanding quest I have benefitted from the advice, assistance, and generosity of many people. Cornell Fleischer imparted his extraordinary knowledge of Al-Bistami and Ottoman history. He generously translated a passage from an Ottoman text into English, checked readings from the original manuscript, and shared photographs of unpublished illustrations from Al-Bistami's Ottoman manuscripts. Jaroslav Folda graciously offered his observations about certain Crusader illuminated manuscripts and representations of Heraclius in Crusader histories. Anthony Kaldellis shared his remarkable knowledge of Byzantine texts. Stefania Gereveni provided insights into the intellectual culture of fourteenth-century Venice. Mihail Mitrea brought to my attention a passage by the patriarch Philotheos Kokkinos about the horseman. Anna Leone discussed colossal Roman images. Marco Aimone shared his knowledge of late-antique metal work. Andrei Timotin offered helpful insights into post-Byzantine prophecies. Claudia Bolgia shared her knowledge of thirteenth- and fourteenth-century Rome. Michalis Kappas introduced me to a spectacular Archangel, shared "his" monuments in Messenia, and transformed the beholding of architecture into a poetic experience. Glenn Peers and Benjamin Anderson read early drafts of Chapter 4. Hendrik Dey provided insightful criticism of a chapter which is no longer part of this book, but which has become the foundation of a new book project devoted to how Troy was imagined in the medieval world. To my former colleagues at Dumbarton Oaks I extend my gratitude for conversations in the garden and valuable lessons about figured speech, strategic silence, and the art of safe criticism.

Drafts of early chapters were written while I held an Excellence Initiative Professorship at Radboud University, Nijmegen, the Netherlands, in Spring 2018. I am most grateful to Olivier Hekster and Daniëlle Slootjes for their hospitality. They, their colleagues, and students created a scintillating environment for working through questions of late antiquity. Intellectual pursuits balanced blissfully with bike rides and excellent beer. I am also grateful to Daniëlle for her helpful comments and suggestions on the first half of the book. We were fortunate to meet at the excellent conference “Byzantine Studies Alive!” that she co-organized with Mariëtte Verhoeven. It is a rare conference that produces a lasting friendship.

I enjoyed talking about this book with Dimitris Hatzilazarou on Naxos, Ingela Nilsson in Istanbul, Luca Zavagno in Ankara, and Karen Manchester in Chicago. Pamela Patton helped me to think about my material in a new way through the lens of the conference she organized on “Art, Power, and Resistance in the Middle Ages.” The dynamic duo of Alice Isabella Sullivan and Alessia Rossi provided intellectual engagement through their conference “Eclecticism at the Edges.” Nathanael Aschenbrenner and Jake Ransohoff were congenial organizers of “Invention of Byzantine Studies,” and careful editors of the resulting volume.

Sections and chapters of the book were presented in various venues. I benefitted from questions and comments from audiences at the Art Institute of Chicago, Bilkent University, Bocconi University, Byzantine Studies Conferences, University of Cologne, Harvard University, Princeton University, Radboud University, Swedish Research Institute in Istanbul, Skopje symposium “Days of Justinian I,” Leeds International Medieval Congress, and Twelfth Congress of the *Association Internationale d’Etudes du Sud-Est Européen* (Bucharest).

I am grateful to numerous institutions, which facilitated the study and publication of images from their collections: the Vatican Library, the British Library, the Bodleian Library, Bibliothèque Nationale de France, Biblioteca Nacional de España, Biblioteca Nazionale Centrale (Florence), University Library and Archives, Eötvös Loránd University (Budapest), Dumbarton Oaks, Universitäts- und Landesbibliothek in Düsseldorf, Istanbul University Library, Allen Memorial Museum (Oberlin), the Library of Congress, Irina Shalina at the Russian Museum, and Andras Németh at the Vatican Library. At DePaul University I express my appreciation to associate provost Lucy Rinehart, dean Guillermo Vasquez de Velasco, and to former provost Marten denBoer for facilitating time away to work on this project. A Competitive Research Grant from

DePaul University enabled me to acquire images and permissions for publication.

Michael Sharp is ever the model editor. He was patient with the manuscript's increasing word count and expanding scope. His sense of humor and good advice on all matters ranging from this book to travel destinations and good chocolates have been most helpful. Anonymous reviewers provided valuable feedback and suggestions. At Cambridge University Press Sarah Starkey shepherded the book through the publication process.

In the course of completing this project I was very fortunate to get to know Michael Maas. His intellectual generosity, good humor, and friendship have been truly enriching. I gratefully acknowledge his prescient comments and helpful critiques which have greatly improved all aspects of this book. A few days before hurricane Harvey hit Houston we shared a most memorable dinner and reminisced like two grizzled veterans swapping war stories. We laughed so hard that we cried. It was a cathartic experience and I will always remember that day very fondly.

This book would not exist without Brian Boeck. He has been a sagely supporter of this project from the very beginning. He spotted a small announcement for a conference in Skopje devoted to Justinian, he masterminded the lunch that turned a frustratingly long article into this book, and he planned travels to the *corazón de Andalucía* for contemplation and consolation. He patiently read multiple drafts, made wise suggestions, posed difficult questions, and corrected what seems like an infinite number of definite articles. He is my inspiration. This book is dedicated him.

## Note on Transliteration and Naming Conventions

Transliteration is as much a pragmatic decision as it is an act of ideological valuation. Historical spelling conventions in English often Latinize names and places in Byzantium. I strove to create a balance between widely established conventions in English and fidelity to context. In this book I usually transliterate names and places from Greek rather than settle for their Latinized equivalents, hence *Augoustaion* rather than *Augusteum*, Prokopios rather than Procopius. In certain instances, Latinized spelling was deployed in order to reflect a specific cultural context or power relationship, such as the memory of Byzantine historical figures in the medieval Latin cultural imagination, hence *Heraclius* rather than *Herakleios*. The same applies to Greek names within a Russian cultural context, hence Epifanii not Epiphanios. For names which have a widely familiar or conventional English form, I consistently used that spelling, hence Constantinople, Constantine, Alexander. I have transliterated Greek and Cyrillic terms and phrases using conventions of what the Library of Congress ironically calls “romanization.”

Selected Timeline of the Triumphal Column of Justinian  
and Its International Reverberations

542/3 –	An equestrian monument from the forum of Theodosios is moved to the Augoustaion and placed at the top of a colossal column, completing Justinian’s forum.
Ca. mid-550s –	Prokopios creates the foundational description of the monument in the <i>Buildings</i> .
Ca. 762 –	Abbasid caliph Abu Ja’far al-Mansur places an equestrian statue at the tallest, most central point of his new capital Baghdad.
839/40 –	The horseman’s grand headgear ( <i>toupha</i> ) falls, greatly distressing the emperor Theophilos. The <i>toupha</i> is acrobatically reinstalled.
Ca. 915–40 –	The column is celebrated as the greatest, foremost wonder of Constantinople by Constantine of Rhodes.
Ca. 1170s. –	The triumphal column is commemorated in the French romance <i>Eracle</i> by Gautier d’Arras as the funerary monument of the emperor Heraclius.
Ca. 1200s –	The horseman is illustrated in a Byzantine Book of Job as the centerpiece of Job’s beloved city during the time of Job’s greatest agony.
1204 –	A member of the Fourth Crusade, Robert de Clari identifies the horseman as Heraclius.

*Timeline of the Triumphal Column of Justinian*

xxv

1204–61 –	The monument is preserved in the Latin empire of Constantinople, but all bronze cladding is removed from the column.
Ca. 1280s –	First Palaiologan description of the monument. George Pachymeres responds to Prokopios. Two bronze “feathers” fall from the <i>toupha</i> . They are placed in the treasury of Hagia Sophia.
1317 –	Emergency restoration of the monument by Andronikos II after the cross fell off the orb. The horseman is secured, new supports created, and the <i>toupha</i> and the orb are regilded.
Ca. 1345 –	The horseman is represented for Ivan Alexander of Bulgaria.
After 1360s –	Emendations and variant readings in manuscripts of <i>The Travels of Sir John Mandeville</i> focus on futile attempts to secure the orb in the horseman’s hand.
Late fourteenth century –	An illustration of the horseman and of Hagia Sophia is commissioned by Epifanii the Wise in Moscow.
Before 1403 –	The equestrian sculpture is fastened to its base with chains.
Ca. 1420s –	Cristoforo Buondelmonti represents the column in his image of Constantinople.
1420s –	The orb falls again.
Ca. 1420s–40s –	Cyriac of Ancona reports the Theodosian inscription on the monument. Some Buondelmonti manuscripts are corrected to account for this discovery.
Ca. 1430–5 –	The orb is once again placed in the rider’s hand.

1453 –	A report claims that the head of Constantine XI is nailed to the column of Justinian by the Ottomans.
1453–5 –	Mehmed the Conqueror has the equestrian monument removed from the column.
Ca. 1450–1500 –	Artists in Italy reimagine the monument.
1490 –	Hartmann Schedel claims that the horseman perished in a foreboding meteorological event.
Ca. 1520 –	The column is demolished by the Ottomans.
Ca. 1550 –	Pierre Gilles sees and measures remaining fragments of the sculpture before their destruction.
Sixteenth–seventeenth centuries –	Icon painters in Russian lands represent the column and the equestrian monument.
Late sixteenth century –	The equestrian monument is represented in apocalyptic manuscripts at the Ottoman court.
1860s –	A Renaissance-period, composite drawing of the monument (now in Budapest) is rediscovered and published. Revival of interest in the visual appearance of the horseman ensues.
