SUBJECT INDEX

- acoustic emission, 261, 355
- activation energy, 23
- alloys, 81, 115, 121, 177, 189, 201, 333, 343
- alumina, 223, 249, 261
- aluminum, 147, 201
- antiphase boundary, 121
- atomic
 - force microscopy (AFM), 201, 365
 - stiffness matrix method, 121
- Auger electron analysis, 249
- beam approximation, 397
- bonding strength, 171
- boron, 121, 183
 - nitride, 243
- brittle
 - ductile
 - criterion, 3, 87
 - transition, 23, 29, 51, 63, 69, 207
 - fracture, 101, 311, 297, 327
- carbon films, 391
- chemical bonding, 177
- cleavage
 - fracture, 23
 - steps, 297
- composites
 - fiber-reinforced
 - ceramic, 215, 267
 - graphite peek polymer, 237
 - glass-bead/epoxy, 229
 - particulate, 229
 - polymer, 281
 - SiC whisker-reinforced alumina, 223
 - wet, 229
- concrete, 255
 - aggregate content, 255
- contact fatigue, 171
- cooperative instability, 51
- copper, 195
- corrosion, 201
 - fatigue, 201
- crack
 - blunting, 63, 95
 - branching, 3
 - finite, displacement field of, 133
 - front, 343
 - growth, 81, 107, 115
 - instability, 289, 297, 311
 - nucleation, 201
 - on interfaces, 141
 - opening displacement, 215, 275
 - propagation, 3, 11
 - direction, 23
 - rapid, 101, 289, 311
 - slowly propagating, 321
 - terminal velocity, 297, 311
 - tip, 29, 45
 - non-emitting, 63
- cracking mechanisms, 261
- creep fatigue, 333
- cyclic deformation, micro/macromechanics, 333
- debonding, 215, 249
- detachment fold, 385
- die
 - attach voids, 155
 - crack failures, 157
- dislocation, 121
 - boundary stresses on, 127
 - bow-out, simulation of, 127
 - embryos, 29
 - emission, 3, 29, 75, 95, 107, 115
 - externally generated, 63
 - line tension, 127
 - migration, 115
 - nucleation, 29, 69
 - patterning, 115, 333
 - Peierls stress, 127
 - pile-ups, 133
 - Shockley partials, 121
 - simulation of, 95, 121, 127, 141
 - free zone, 163
- ductile rupture, 147
- embedded atom method, 75, 121, 133
- embrittlement, 195
 - dynamic, 189
- energy release rate, 163
- fatigue, 201
- fiber-reinforced composites: *see composites*
- fibrous monolithic ceramics, 243
- film effects, 207
- finite element analysis, 155
- first principles quantum-mechanical
 - calculations, 177, 183
- FLMTO total-energy method, 183
- focused ion beam, 45
- fractal dimension, 237, 359, 371
- fracture surface, 321, 343, 359, 365, 371, 377
- friction, 215, 385
- glass transition, 281
- grain boundaries, 195
- Green's functions, 95, 141, 267
- hexatic phase, 69
- ideal cleavage fracture, 183
- impurities, 183
- in situ* observation, 223, 261

- instability dynamics, 311
- interface
 - GaAs, 155
 - hetero-, 249
 - metal ceramic, 147, 163
 - NiAl-Cr, 177
 - reinforced polymer, 275
 - weak, 229
- interfacial fracture, 163, 171
 - resistance, 243
- intergranular fracture, 189, 249
- iron (alpha-Fe), 133
- kinetic roughening, 11
