Materials Research Society Symposium Proceedings xiii

GRAPHENE AND BEYOND GRAPHENE

*** Layered Nanostructures – Electronic and Mechanical Properties 3**
Gotthard Seifert, Tommy Lorenz, and Jan-Ole Joswig

*** Graphene and the Advent of Other Layered-2D Materials for
Nanoelectronics, Photonics and Related Applications 11**
Anupama B. Kaul

GRAPHENE

**Chemical Stability of Epoxy Functionalizations of Graphene:
A Density Functional Theory Study 19**
Si Zhou and Angelo Bongiorno

**Graphene Oxide-supported Two-dimensional
Microporous Polystyrene 25**
Yi Ouyang, Dingcai Wu, and Ruowen Fu

**Discrete Gauge Fields for Graphene Membranes under
Mechanical Strain 31**
James V. Sloan, Alejandro A. Pacheco Sanjuan,
Zhengfei Wang, Cedric M. Horvath,
and Salvador Barraza-Lopez

**Electron Irradiation of Graphene Field Effect
Transistor Devices 35**
Sung Oh Woo and Winfried Teizer

*Invited Paper

Electrical Transport of Zig-zag and Folded Graphene Nanoribbons41
 Watheq Elias, M. Elliott, and C.C. Matthai

Transparent Graphene-platinum Films for Advancing the Performance of Dye-sensitized Solar Cells47
 P.T. Shih, R.X. Dong, K.C. Ho, and J.J. Lin

Graphyne Oxidation: Insights From a Reactive Molecular Dynamics Investigation.53
 L.D. Machado, P.A.S. Autreto, and D.S. Galvao

On the Dynamics of Graphdiyne Hydrogenation.59
 P.A. Autreto, J.M. de Sousa, and D.S. Galvao

Atomic and Electronic Structure of Multilayer Graphene on a Monolayer Hexagonal Boron Nitride65
 Celal Yelgel and Gyaneshwar P. Srivastava

OTHER 2D-LAYERED MATERIALS

Ambipolar Transport in MoS₂ based Electric Double Layer Transistors73
 Jianting Ye, Yijin Zhang, and Yoshihiro Iwasa

Field-induced Superconductivity in MoS₂79
 Y.J. Zhang, J.T. Ye, and Y. Iwasa

Electron Microscopic Characterization of Multi-layer Boron Nitride Nanosheets.85
 Muhammad Sajjad and Peter Feng

The Hydrogenation Dynamics of h-BN Sheets91
 Eric Perim, Ricardo Paupitz,
 P.A.S. Autreto, and D.S. Galvao

Mechanical Properties and Fracture Dynamics of Silicene Membranes99
 Tiago Botari, Eric Perim, P.A.S. Autreto,
 Ricardo Paupitz, and Douglas S. Galvao

CARBON NANOTUBES

- Covalent Chemical Modification of Single-walled Carbon Nanotubes Using Azide Functionalised Anthraquinone Derivatives for Pseudocapacitor Application**111
Charlotte Frayère, Christophe Galindo, Laurent Divay,
Michel Paté, and Pierre Le Barny
- Determining In-plane and Thru-plane Percolation Thresholds for Carbon Nanotube Thin Films Deposited on Paper Substrates Using Impedance Spectroscopy.**117
Rachel L. Muhlbauer and Rosario A. Gerhardt
- The Electric Resistance and the Transport Properties of Carbon Nanotube with a Cu chain: A First-principle Study.**123
Chengyu Yang and Quanfang Chen
- Field Emission Vacuum Electronic Devices Utilizing Ultrathin Carbon Nanotube Sheet**129
Hai H. Van and Mei Zhang
- Functionalized Carbon Nanotube Matrix for Inducing Noncovalent Interactions Toward Enhanced Catalytic Performance of Metallic Electrode.**135
Le Q. Hoa, Hiroyuki Yoshikawa,
Masato Saito, and Eiichi Tamiya

CARBON NANOMATERIALS

- Reactive Template-induced Self-assembly to Ordered Mesoporous Polymer and Carbon**143
Yeru Liang, Ruowen Fu, and Dingcai Wu
- Study and Characterization of the Carbon-based Nanoparticles Obtained from PET**149
Alena Borisovna Kharissova, Edgar de Casas Ortiz,
Oxana V. Kharissova, Ubaldo Ortiz Mendez,
and Boris I. Kharisov

PREFACE

For almost two decades now, the carbon nanomaterial (CNM) system has persistently provided researchers the opportunity for spectacular new discoveries, significant advances in fundamental and applied science, and the development of disruptive technologies and applications. The rich allotropicity of carbon bonding can explain the broad use of carbon-based materials such as carbon nanotubes (CNT), diamond, fullerenes, and more recently graphene. Today's research community continues to discover and harness new low-dimensional carbon allotropes, perhaps at a historically unprecedented rate. In this context, carbon nanotubes, nanodiamond, and graphene, have become versatile platforms for new materials properties and device architectures, and are finding their way into nearly every facet of the research world, including conductive polymers, transparent electrodes, chemical sensors, high-frequency devices, optoelectronic sensors, alternative energy, and bio-inspired systems, to name a few. At the same time, researchers from diverse disciplines are pushing the frontiers of these materials by developing innovative arrays of ribbon, hybrid, functionalized, doped, and hetero structures often resulting in dramatically new scientific and engineering directions.

The significance of CNMs is demonstrated by the daily stream of new research publications – many of which are in journals of highest impact factors – addressing a broad range of experimental and theoretical materials-related topics including synthesis, characterization, integration, and devices. Interdisciplinary topics related to the materials science, chemistry, physics, mechanics, and engineering of CNMs such as graphene, carbon nanotubes, nanoribbons, nanodiamond, graphene oxide, graphane, fluorographene, graphene composites (and many others) were the focus of these symposia, with a long-term outlook on applications of these materials.

Within these CNMs, the isolation of graphene has been a turning point which has resulted in the emergence of a new research area namely “atomically-thick 2-Dimensional systems”, in which monolayers of layered materials such as BN, BCN, MoS₂, WS₂, etc., are now being isolated and studied. In contrast to the graphene gapless density of states, other 2D systems could possess well-defined and tunable electronic gaps, thus offering numerous potential applications in nanoelectronics and optoelectronics, such as sensors, logic devices, high energy rechargeable batteries, photodiodes, etc. However, there are numerous challenges that need to be overcome regarding the synthesis of mono-, bi-, tri-layers as well as their optical/electronic characterization. All these exciting developments and others, are also covered in the following contributions and we hope the reader find them
