## CONTENTS

Preface .....	xi
Acknowledgments.....	xiii
Materials Research Society Symposium Proceedings.....	xv

### *CAPTURE AND IMMOBILIZATION OF RADIONUCLIDES*

* Current Status of Immobilization Techniques for Geological Disposal of Radioactive Iodine in Japan. ....	3
Kazuya Idemitsu and Tomofumi Sakuragi	
* French Studies on the Development of Potential Conditioning Matrices for Iodine 129 .....	15
Lionel Campayo, Fabienne Audubert, Jean-Eric Lartigue, Eglantine Courtois-Manara, Sophie Le Gallet, Frédéric Bernard, Thomas Lemesle, François O. Mear, Lionel Montagne, Antoine Coulon, Danielle Laurencin, Agnès Grandjean, and Sylvie Rossignol	
Effects of Hydrosulfide and pH on Iodine Release from an Alumina Matrix Solid Confining Silver Iodide .....	21
Tomofumi Sakuragi, Satoshi Yoshida, Osamu Kato, and Kaoru Masuda	
Evaluation of Sorption Behavior of Iodide Ions on Calcium Silicate Hydrate and Hydrotalcite. ....	29
Taiji Chida, Jun Furuya, Yuichi Niibori, and Hitoshi Mimura	
Study of the Release of the Fission Gases (Xe and Kr) and the Fission Products (Cs and I) under Anoxic Conditions in Bicarbonate Water .....	35
Ernesto González-Robles, Markus Fuß, Elke Bohnert, Nikolaus Müller, Michel Herm, Volker Metz, and Bernhard Kienzler	

\*Invited Paper

- \* **Technetium Getters to Improve Cast Stone Performance . . . . .** 43  
James J. Neeway, Amanda R. Lawter, R. Jeffrey Serne,  
R. Matthew Asmussen, and Nikolla P. Qafoku

- Selective Ordering of Pertechnetate at the Interface between  
Amorphous Silica and Water: A Poisson Boltzmann Treatment . . . . .** 53  
Christopher D. Williams, Karl P. Travis, John H. Harding,  
and Neil A. Burton

## *DEVELOPMENT AND CHARACTERIZATION OF WASTE FORMS*

- Pressureless Sintering of Sodalite Waste-forms for the Immobilization  
of Pyroprocessing Wastes . . . . .** 61  
M.R. Gilbert

- MoO<sub>3</sub> Incorporation in Alkaline Earth Aluminosilicate Glasses . . . . .** 67  
Shengheng Tan, Michael I. Ojovan, Neil C. Hyatt,  
and Russell J. Hand

- Valence and Local Environment of Molybdenum in Aluminophosphate  
Glasses for Immobilization of High Level Waste from  
Uranium-graphite Reactor Spent Nuclear Fuel Reprocessing . . . . .** 73  
Sergey V. Stefanovsky, Andrey A. Shiryaev,  
Michael B. Remizov, Elena A. Belanova, Pavel A. Kozlov,  
and Boris F. Myasoedov

- Copper Valence and Local Environment in Aluminophosphate  
Glass-ceramics for Immobilization of High Level Waste from  
Uranium-graphite Reactor Spent Nuclear Fuel Reprocessing . . . . .** 79  
Sergey V. Stefanovsky, Andrey A. Shiryaev,  
Michael B. Remizov, Elena A. Belanova, Pavel A. Kozlov,  
and Boris F. Myasoedov

- Nepheline Crystallization in High-alumina High-level Waste Glass. . . . .** 85  
José Marcial, John McCloy, and Owen Neill

- Wet Chemical and UV-Vis Spectrometric Iron Speciation in Quenched  
Low and Intermediate Level Nuclear Waste Glasses . . . . .** 93  
Jamie L. Weaver, Nathalie A. Wall, and John S. McCloy

\*Invited Paper

<b>A Sampling Method for Semi-quantitative and Quantitative Electron Microprobe Analysis of Glass Surfaces .....</b>	<b>101</b>
Jamie L. Weaver, Joelle Reiser, Owen K. Neill, John S. McCloy, and Nathalie A. Wall	
<b>The Void Fraction of Melter Feed During Nuclear Waste Glass Vitrification.....</b>	<b>107</b>
Zachary J. Hilliard and Pavel R. Hrma	
<b>Charge Compensation in Trivalent Doped Ca<sub>3</sub>(SiO<sub>4</sub>)Cl<sub>2</sub>.....</b>	<b>113</b>

## PREFACE

The Materials Research Society's Symposium EE, entitled "Scientific Basis for Nuclear Waste Management XXXVIII," was held November 30<sup>th</sup> through December 5<sup>th</sup>, 2014, at the MRS Fall Meeting in Boston, Massachusetts. The symposium discussed the key scientific challenges for the safe and effective management of spent nuclear fuel and radioactive waste and provided an overview of the international research and waste management programs around the world. Waste forms and engineered barrier system properties, interactions between engineered and geological systems, radiation effects, chemistry and transport of radionuclides, and long-term predictions of repository performance were just some of the topics presented at the symposium by internationally renowned speakers and leading researchers in the field.

The symposium attracted 85 abstracts. This proceedings volume contains 31 papers from the meeting. The papers were divided into four sections: (1) Capture and Immobilization of Radionuclides, (2) Development and Characterization of Waste Forms, (3) Corrosion Behavior of Materials, and (4) Storage and Disposal of Nuclear Waste. Each paper provides a glimpse of the recent advances in nuclear waste management, which presents a global challenge for further development of the nuclear power industry. In spite of significant opposition worldwide after the accident at the Fukushima Daiichi nuclear power plant, we hope that over the next few decades, current and future generations of scientists and technologists will design, implement, and communicate an integrated understanding of the multi-scale processes involved in the processing, packaging, disposal, and regulation of the wide variety of materials designated as nuclear waste.

## Acknowledgments

The organizers of this symposium sincerely thank all of the oral and poster presenters who contributed to this proceedings volume. We also thank the reviewers for valuable feedback to the editors and to the authors. The organizers of Symposium are grateful to the United States Department of Energy Office of River Protection for its financial support.
