

## CONTENTS

|   |      |
|---|------|
| Preface .....   | xi   |
| Acknowledgments.....                                  | xiii |
| Materials Research Society Symposium Proceedings..... | xv   |

### *CAPTURE AND IMMOBILIZATION OF RADIONUCLIDES*

|  |    |
|--|----|
| * Current Status of Immobilization Techniques for Geological Disposal of Radioactive Iodine in Japan. ....   | 3  |
| Kazuya Idemitsu and Tomofumi Sakuragi  |    |
| * French Studies on the Development of Potential Conditioning Matrices for Iodine 129 .....  | 15 |
| Lionel Campayo, Fabienne Audubert, Jean-Eric Lartigue,<br>Eglantine Courtois-Manara, Sophie Le Gallet,<br>Frédéric Bernard, Thomas Lemesle, François O. Mear,<br>Lionel Montagne, Antoine Coulon, Danielle Laurencin,<br>Agnès Grandjean, and Sylvie Rossignol |    |
| Effects of Hydrosulfide and pH on Iodine Release from an Alumina Matrix Solid Confining Silver Iodide .....  | 21 |
| Tomofumi Sakuragi, Satoshi Yoshida, Osamu Kato,<br>and Kaoru Masuda  |    |
| Evaluation of Sorption Behavior of Iodide Ions on Calcium Silicate Hydrate and Hydrotalcite. ....  | 29 |
| Taiji Chida, Jun Furuya, Yuichi Niibori,<br>and Hitoshi Mimura   |    |
| Study of the Release of the Fission Gases (Xe and Kr) and the Fission Products (Cs and I) under Anoxic Conditions in Bicarbonate Water .....   | 35 |
| Ernesto González-Robles, Markus Fuß, Elke Bohnert,<br>Nikolaus Müller, Michel Herm, Volker Metz,<br>and Bernhard Kienzler  |    |

\*Invited Paper

\* **Technetium Getters to Improve Cast Stone Performance . . . . . 43**

James J. Neeway, Amanda R. Lawter, R. Jeffrey Serne,  
R. Matthew Asmussen, and Nikolla P. Qafoku

**Selective Ordering of Pertechnetate at the Interface between  
Amorphous Silica and Water: A Poisson Boltzmann Treatment . . . . . 53**

Christopher D. Williams, Karl P. Travis, John H. Harding,  
and Neil A. Burton

**DEVELOPMENT AND CHARACTERIZATION OF WASTE FORMS**

**Pressureless Sintering of Sodalite Waste-forms for the Immobilization  
of Pyroprocessing Wastes . . . . . 61**

M.R. Gilbert

**MoO<sub>3</sub> Incorporation in Alkaline Earth Aluminosilicate Glasses . . . . . 67**

Shengheng Tan, Michael I. Ojovan, Neil C. Hyatt,  
and Russell J. Hand

**Valence and Local Environment of Molybdenum in Aluminophosphate  
Glasses for Immobilization of High Level Waste from  
Uranium-graphite Reactor Spent Nuclear Fuel Reprocessing . . . . . 73**

Sergey V. Stefanovsky, Andrey A. Shiryaev,  
Michael B. Remizov, Elena A. Belanova, Pavel A. Kozlov,  
and Boris F. Myasoedov

**Copper Valence and Local Environment in Aluminophosphate  
Glass-ceramics for Immobilization of High Level Waste from  
Uranium-graphite Reactor Spent Nuclear Fuel Reprocessing . . . . . 79**

Sergey V. Stefanovsky, Andrey A. Shiryaev,  
Michael B. Remizov, Elena A. Belanova, Pavel A. Kozlov,  
and Boris F. Myasoedov

**Nepheline Crystallization in High-alumina High-level Waste Glass. . . . . 85**

José Marcial, John McCloy, and Owen Neill

**Wet Chemical and UV-Vis Spectrometric Iron Speciation in Quenched  
Low and Intermediate Level Nuclear Waste Glasses . . . . . 93**

Jamie L. Weaver, Nathalie A. Wall, and John S. McCloy

\*Invited Paper

|  |            |
|--|------------|
| <b>A Sampling Method for Semi-quantitative and Quantitative Electron Microprobe Analysis of Glass Surfaces .....</b> | <b>101</b> |
| Jamie L. Weaver, Joelle Reiser, Owen K. Neill,<br>John S. McCloy, and Nathalie A. Wall                               |            |
| <b>The Void Fraction of Melter Feed During Nuclear Waste Glass Vitrification.....</b>                                | <b>107</b> |
| Zachary J. Hilliard and Pavel R. Hrma  |            |
| <b>Charge Compensation in Trivalent Doped Ca<sub>3</sub>(SiO<sub>4</sub>)Cl<sub>2</sub>.....</b>                     | <b>113</b> |
| M.R. Gilbert   |            |
| <b>Effect of Charge-balancing Species on Sm<sup>3+</sup> Incorporation in Calcium Vanadinite .....</b>               | <b>119</b> |
| M.R. Gilbert   |            |

## *CORROSION BEHAVIOR OF MATERIALS*

|   |            |
|---|------------|
| <b>* Key Phenomena Governing HLW Glass Behavior in the French Deep Geological Disposal .....</b>  | <b>127</b> |
| Stéphan Schumacher, Christelle Martin, Yannick Linard,<br>Frédéric Angeli, Delphine Neff, Abdesselam Abdelouas,<br>and Xavier Crozes                                    |            |
| <b>Glass Corrosion in the Presence of Iron-bearing Materials and Potential Corrosion Suppressors .....</b>  | <b>139</b> |
| Joelle Reiser, Lindsey Neill, Jamie Weaver,<br>Benjamin Parruzot, Christopher Musa, James Neeway,<br>Joseph Ryan, Nikolla Qafoku, Stéphane Gin,<br>and Nathalie A. Wall |            |
| <b>Uncertainty in the Surface Area of Crushed Glass in Rate Calculations .....</b>  | <b>145</b> |
| William L. Ebert, Charles L. Crawford,<br>and Carol M. Jantzen  |            |
| <b>* About U(t) Form of pH-dependence of Glass Corrosion Rates at Zero Surface to Volume Ratio .....</b>  | <b>153</b> |
| Michael I. Ojovan and William E. Lee  |            |
| <b>* Glass Degradation in Performance Assessment Models .....</b>   | <b>163</b> |
| William L. Ebert  |            |

\*Invited Paper

|   |            |
|---|------------|
| <b>Hierarchical Modeling of HLW Glass-gel-solution Systems for Stage 3 Glass Degradation . . . . .</b>  | <b>173</b> |
| Carol M. Jantzen and Charles L. Crawford  |            |
| <b>Solution Composition Effects on the Dissolution of a CeO<sub>2</sub> Analogue for UO<sub>2</sub> and ThO<sub>2</sub> Nuclear Fuels . . . . .</b> | <b>185</b> |
| Claire L. Corkhill, Martin C. Stennett, and Neil C. Hyatt   |            |

## *STORAGE AND DISPOSAL OF NUCLEAR WASTE*

|  |            |
|--|------------|
| <b>* Deep Borehole Disposal Research: What Have We Learned from Numerical Modeling and What Can We Learn? . . . . .</b>                                    | <b>193</b> |
| Karl P. Travis and Fergus G.F. Gibb  |            |
| <b>Characteristics of Cementitious Paste for Use in Deep Borehole Disposal of Spent Fuel and High Level Wasteforms . . . . .</b>                           | <b>205</b> |
| Nick C. Collier, Karl P. Travis, Fergus G.F. Gibb,<br>and Neil B. Milestone  |            |
| <b>* Physicochemical Properties of Vitrified Forms for LILW Generated from Korean Nuclear Power Plant. . . . .</b>   | <b>211</b> |
| Cheon-Woo Kim, Hyehyun Lee, In-Sun Jang, Hyun-Jun Jo,<br>and Hyun-Je Cho   |            |
| <b>Release of <sup>108</sup>Ag from Irradiated PWR Control Rod Absorbers under Deep Repository Conditions . . . . .</b>                                    | <b>217</b> |
| O. Roth, M. Granfors, A. Puranen, and K. Spahiu  |            |
| <b>Advancing the Modelling Environment for the Safety Assessment of the Swedish LILW Repository at Forsmark . . . . .</b>                                  | <b>223</b> |
| Henrik von Schenck, Ulrik Kautsky, Björn Gylling,<br>Elena Abarca, and Jorge Molinero  |            |
| <b>Analysis of Radionuclide Migration with Consideration of Spatial and Temporal Change of Migration Parameters Due to Uplift and Denudation . . . . .</b> | <b>229</b> |
| Taro Shimada, Seiji Takeda, Masayuki Mukai,<br>Masahiro Munakata, and Tadao Tanaka   |            |

\*Invited Paper

|  |             |
|--|-------------|
| <b>Pore and Mineral Structure of Rock using Nano-tomographic Imaging</b> .....                             | <b>235</b>  |
| Jukka Kuva, Mikko Voutilainen, Antero Lindberg,<br>Joni Parkkonen, Marja Siitari-Kauppi, and Jussi Timonen |             |
| <b>Author Index</b> .....  | <b>.241</b> |
| <b>Subject Index</b> .....   | <b>.243</b> |
