TRACHEOSTOMY: A MULTIPROFESSIONAL HANDBOOK

- waste disposal 353–354
- water (moisture) in air 143–144, 145, 146–147
- protecting stoma from 297, 315
- weaning mechanical ventilation 37
  - definitions 132
  - ICU patients 123, 132–137
  - modes of ventilation used 133–134
  - protocol directed 134–135
  - role of physiotherapy 138
  - role of speaking valve 135–137, 138
- tracheostomy 260–262
  - chart 259–260, 266–268
  - indications 257
  - multidisciplinary management 256
  - problems/troubleshooting 262–263
  - tube type and size for 258–259
  - see also decannulation
- weight, body 362–363
- Wilson risk scoring system 73

- work of breathing 6
  - assessment, in ICU patients 126
  - effects of tracheostomy 123

- wound
  - assessment 174
  - closure 49, 54
  - dressings see dressings, wound
  - packing 48
  - see also stoma
  - wound care 173–186
  - after decannulation 183–185, 264–265
  - in head and neck cancer 281
  - hypergranulation 181–183
  - immediate post-operative 173–174
  - paediatric patients 323
  - peri-stoma skin 175–176
  - wound infections 55, 65, 175, 181, 355

- writing 229

- XLT tubes 100, 101

- Yang's Rapid Shallow Breathing Index 133
