

Contents

	Introduction	
1 Cells	1.1 Neurons	Hugh Robinson
	1.2 The Physiology of Neurons, Synapses and Receptors	
	1.3 Modelling Single Neurons and Their Combinations in Circuits	
	1.4 Glia	
2 Neurotransmitters and Receptors	2.1 The Chemical Synapse	Emanuele F. Osimo and Stephen M. Stahl
	2.2 Classification of Receptors: Metabotropic and Ionotropic Receptors	
	2.3 Neuronal Receptors and Drug Targets	
	2.4 Basic Pharmacology of Specific Neurotransmitter Pathways	
	2.5 Neuropeptides	I. Sadaf Farooqi
	2.6 Genetic Association Studies and Neurotransmitter Pathways	Jeremy Hall and Jack F. G. Underwood
	2.7 Opioids and Common Recreational Drugs	Ewan St John Smith and Anne Lingford-Hughes
3 Basic Techniques in Neuroscience	3.1 Recording from the Brain	Rudolf N. Cardinal
	3.2 Perturbing Brain Function	
	3.3 Animal Models of Psychiatric Disease	
	3.4 Data Analysis and Computational Modelling	
	3.5 Functional Neuroimaging and Connectivity	
4 Neuroanatomy	4.1 Fundamentals	Laith Alexander
	4.2 The Basal Ganglia	Guilherme Carvalho Ribas, Andre Felix Gentil and Eduardo Carvalho Ribas
	4.3 The Temporal Lobes	
	4.4 The Frontal Lobes	
	4.5 White Matter Pathways	
	4.6 Ascending Neurotransmitter Systems	Jeffrey W. Dalley and Rebecca P. Lawson
5 Neural Circuits	5.1 Appetite	I. Sadaf Farooqi
	5.2 Sleep	Ute Stead and Stephen M. Stahl
	5.3 Sex and Sex Hormones	Glenda Gillies
	5.4 Violence and Aggression	Herbert E. Covington III and Klaus A. Miczek
	5.5 Nociception and Pain	Ewan St John Smith and Michael C. Lee
	5.6 The Motor System and Movement Disorders	Kirsten Scott and Roger Barker
	5.7 Computational Models of Learning	Rebecca P. Lawson and Vincent Valton
	5.8 Habit Formation	Claire M. Gillan
	5.9 Reward, Pleasure and Motivation	Wolfram Schultz

	5.10 Emotion	Angela C. Roberts and Hannah F. Clarke
	5.11 Perception	John D. Mollon
	5.12 Attention	Trevor W. Robbins and Barbara J. Sahakian
	5.13 Apathy, Anhedonia and Fatigue	Jonathan Roiser and Masud Husain
	5.14 Memory	Amy L. Milton and Jon S. Simons
	5.15 Fronto-Executive Functions	Angela C. Roberts and Trevor W. Robbins
	5.16 Empathy and Theory of Mind	Markus Boeckle and Nicola S. Clayton
	5.17 Language	Matthew A. Lambon Ralph
5.18 Brain Networks and Dysconnectivity	Sarah E. Morgan and Ed Bullmore	
6 Modulators	6.1 The Hypothalamic–Pituitary (Neuroendocrine) Axis	Russell Senanayake, James MacFarlane, Merel van der Meulen, Wael A. Bashari and Mark Gurnell
	6.2 The Stress Response and Glucocorticoids	Jeffrey W. Dalley and Joe Herbert
	6.3 Adrenal Steroids	Joe Herbert and Ian M. Goodyer
	6.4 Inflammation and Immune Responses	Mary-Ellen Lynall
7 Genetics	7.1 Basic Genetic Principles and the History of Gene Identification	James Walters and Kimberley Kendall
	7.2 Common Variation	
	7.3 Rare Variation	
	7.4 Epigenetics	
	7.5 The Clinical Application of Genetics in Psychiatry	
8 Neurodevelopment and Neuroplasticity	8.1 The Development of Brain Structure and Function	Richard Bethlehem and Jakob Seidlitz
	8.2 Neurodevelopmental Models of Psychiatric Disorders	
	8.3 Attachment	Lane Strathearn
	8.4 Neuroplasticity	Jeffrey W. Dalley and Victoria Leong
	8.5 Intelligence and Intellectual Disability	Shahid H. Zaman

<p>9</p> <p>Integrated Neurobiology of Specific Syndromes and Treatments</p>	9.1 Autism	Meng-Chuan Lai and Simon Baron-Cohen
	9.2 Attention Deficit Hyperactivity Disorder	Marina Mitjans and Bru Cormand
	9.3 Drug Use, Addiction, Tolerance, Withdrawal and Relapse	Alexandra Hayes and Anne Lingford-Hughes
	9.4 Anxiety Disorders	Nathan Huneke, Bethan Impey and David Baldwin
	9.5 Post-Traumatic Stress Disorder	Eric Vermetten
	9.6 Obsessive–Compulsive and Related Disorders	Eileen M. Joyce and Naomi A. Fineberg
	9.7 Major Depressive Disorder	Alexander Kaltenboeck and Catherine Harmer
	9.8 Bipolar Affective Disorder	Nefize Yalin and Allan H. Young
	9.9 Psychosis	Paul C. Fletcher
	9.10 Schizophrenia	Emilio Fernandez-Egea and Peter B. Jones
	9.11 Borderline Personality Disorder	Patrick Luyten, Peter Fonagy and Chloe Campbell
	9.12 Self-Harm and Suicidality	Paul O. Wilkinson and Anne-Laura van Harmelen
	9.13 Medically Unexplained Symptoms	Mai Wong and Ruaidhrí McCormack
	9.14 Delirium	Colm Cunningham and Mark A. Oldham
	9.15 Perinatal Disorders	Marisa Casanova Dias, Ian Jones and Louise M. Howard
	9.16 Sleep Disorders	Ute Stead
	9.17 Eating Disorders	Andreas Stengel and Sophie Scharner
	9.18 Epilepsy and Seizures	Manny Bagary
	9.19 Electroconvulsive Therapy	George Kirov and Pascal Sienaert
9.20 Brain Stimulation	Camilla L. Nord	
<p>10</p> <p>Neurodegeneration</p>	10.1 A Neurodegenerative Cascade of Causality	James B. Rowe and Alexander G. Murley
	10.2 Prodromal Disease and Mild Cognitive Impairment	
	10.3 Preclinical Stages of Neurodegenerative Disease	
	10.4 Spectra, Domains and Dimensions of Neurodegenerative Disease	
	10.5 Reserve, Resilience and Resistance to Neurodegeneration	
	10.6 Environmental Causes of Neurodegenerative Disease	
	10.7 Comorbidity and Dual Pathology in Neurodegenerative Disorders	

For lecturers and instructors interested in using this text on their course, please email collegesales@cambridge.org and lecturers@cambridge.org for further information, including lecture slides
