Acknowledgements for the First Edition

Interviews to evaluate the CANDID were undertaken by Helen Philp, Jane Sayer, Elizabeth Harris and Donna McGee. Maria Fotiadou and Declan Murphy contributed at various stages in the development of the CANDID.

The authors are grateful to Karen Langridge (at PRiSM) and Chris Laming (at ESTIA) who provided

expert administrative support. The invaluable statistical advice from Morven Leese is also acknowledged.

The authors would like to thank all the service users, carers and staff members who took part in the validity and reliability study. Without their contribution the CANDID development project would not have been possible.

Acknowledgements for the Second Edition

The authors would like, in addition to the people acknowledged in the first edition of the CANDID book, to thank colleagues who used CANDID for clinical and research purposes since its publication. Special thanks to those who, by publishing their work, contributed to the growing CANDID

literature. Finally, the authors would like to thank clinical, academic and management colleagues including Dene Robertson, Quinton Deeley and Jill Lockett, of South London and Maudsley NHS Foundation Trust for their support with the dissemination of CANDID.
